Note the long broad leaves on this new  
O & M Hy-Cross T-13

Note the strong root system

1 BU. \$3.25    F.O.B. Green Springs, Bags Free

Above picture of O & M Hy-Cross T-13 was taken in our trial grounds and shows the immense growth of silage that this wonderful new hy-cross produces. This is a cross of two outstanding ensilage corns and produces more silage than any corn we have ever grown. Earlier than Eureka, this cross has greatly improved the root system, making a stronger, hardier plant. Any farmer that grows silage corn will be delighted with this product.
